5a download. I usually use pirox pyptool 3.3.5a mp3 from ic engine because it contains more than 195 more episodes and I believe you will find it easily in google.pirox pyptool 3.3.5a and here is the download link. pdf.Q: How to get index of the parent node in React Native? I am creating a React Native app with the API call which returns a list of nodes where each node consists of a name, image, and ID. [{ name: 'Jairrep', image: "", id: '584476' }, { name: 'Pemens', id: '584958' }, { name: 'Tpenra', id: '584976' }] So my code looks like this import React, { Component } from 'react'; import { FlatList, StyleSheet, Text, View } from 'react-native'; import { ListItem, ListItemLabel } from 'react-native-elements'; export default class BestSellerList extends Component { render() { return (
